Regional Assessment Initiative

Introduction to the
working groups

Ferenc Lakatos

Regional Assessment Initiative

- Objectives:

1. Analyse the current state of forest invasive species in Europe and Central Asia,
2. Strengthen the information exchange among REUFIS members and identify fields of joint action.

Planned outputs

- A state of the art report (overview)
- Findings to be presented and discussed on the next REUFIS meeting in Autumn 2019

Proposed enquiry

- General information
- Thematic parts
 - Pathogens
 - Invertebrates
 - Vertebrates
 - Plants
- Each part includes quantitative & qualitative questions

Proposed enquiry

- Example for quantitative question:

To what extent limit the forest invasive species the sustainable management of forests and wooded land in your country?

Please set ranking [between 1 (not at all) – 9 (to a great extent), 0 (do not know/no opinion)] and explain your ranking

Proposed enquiry

- Example for qualitative question:

What are the emerging issues, which are driving the change (increase or decrease) of forests and wooded land effected by forest invasive [pathogens/vertebrates/invertebrates/plants] in your country? Please provide examples.

Thank you for your attention!
