

Forest Invasive Species Network for Europe and Central Asia (REUFIS)

Ferenc Lakatos, Secretary

14 October 2025

The REUFIS Network

REUFIS member countries

- Established 2017 (REU & country initiative) on FIS
 - 31 member countries
 - four thematic areas (plants, pathogens, invertebrates and vertebrates)
- Objectives:
 - Promote collaboration between member countries
 - Share expertise and information
 - Coordinate activities on FIS
 - Raise awareness in management of FIS
 - Communication link with international and regional organizations

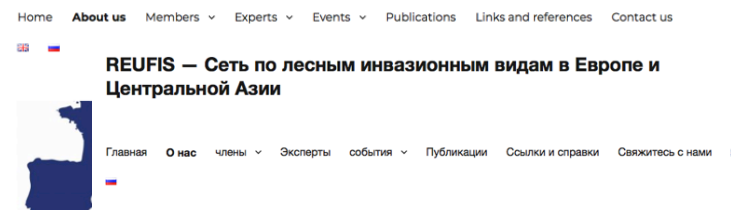

- Annual meetings and regular trainings
 - **Minsk (BY), 2016:** Preparatory meeting
 - **Budapest (HU), 2017:** Training on bark and ambrosia beetle identification
 - **Zdanovicy (BY), 2018:** Training on forest pathogens in Europe
 - **Bursa (TR), 2019:** Invasive pest and pathogens on nut trees
 - **Webinar, 2020:** Protecting oak trees for future generations in Europe and Central Asia
 - **Webinar, 2021:** Contingency plans and early warning systems – how can they help protect forest
 - **Sopron (HU), 2022:** Monitoring of native and introduced saproxylic insects for effective prevention and management
 - **Sopron (HU), 2023:** Digital solution for better forest health monitoring in Europe and Central Asia
 - **Skopje (NM), 2024:** The role of invasive species in urban forest planning
 - **Ljubljana (SI), 2025:** Combating invasive plants in forests and cities in the REU region
